

Anchor Bracket Mount Kit

Items supplied

Items supplied with the anchor bracket mount kit are show in [Figure 1](#).

Figure 1 Items supplied with anchor bracket mount kit

1	Anchor bracket (4x)
---	---------------------

Installation

1. Determine the proper site location for permanent installation.
2. Adjust the four leveling feet to level the sampler. Turn the feet to the right to raise the sampler (see [Figure 2 on page 2](#)).
3. Locate the screws around the base of the cabinet. The front and rear screws are used to mount the anchor brackets to the sampler.
4. Remove one screw from the cabinet. Slide the screw through the slot in the anchor bracket and tighten halfway.

Note: Install only one bracket at a time. The sampler may become unstable if multiple screws are removed at once.

5. With the screw still loose, allow the anchor to drop down firmly in contact with mounting surface (floor, concrete, etc.).
6. Assemble the remaining three brackets, one at a time.
7. Secure the anchor brackets to the mounting surface as required for individual installation.

Note: A customer-supplied 7/16 bolt or stud is recommended to make sure the mounting is secure.

8. Tighten all screws and bolts.

Figure 2 Installation of anchor bracket mounts

1	AWRS footprint with anchor brackets	5	Leveling foot (4x)
2	AWRS permanent installation mounting pad	6	7/16 bolt or stud recommended (4x) (not supplied)
3	Anchor bracket (4x)	7	Standard mounting
4	Minimum pad size	8	Standard mounting with optional anchor bracket
