

GuardianBlue™ Early Warning System Service Options

Distribution Monitoring

Keep your GuardianBlue Water Security System online and accurate with one of these service plans.

Start-up is included with every GuardianBlue Early Warning System. We also offer the optional service plans called FSPGuardianB4 and FSPGuardianB12. FSP=Field Service Plan.

With the FSPGuardianB4 plan, a Hach service professional visits your site on a quarterly basis and

will give you help at upkeeping your GuardianBlue system. With this plan you will still need to replace the monthly reagents used by the instruments.

The FSPGuardianB12 plan visits your site every month and we take care of virtually everything.

Make reagent and parts delivery simple and easy.

GuardianBlue Early Warning System requires the use of reagents on a monthly and quarterly basis. These product numbers were designed to minimize any of the hassles associates with obtaining reagents and/or maintenance parts. Just ask your customer service representative to do a "future ship date" and tell the representative your desired ship date.

Choose either of these two Product Numbers depending on the reagent you use with your CL17 Chlorine Analyzer.
